

Valor Assisted Living & Adult Care Home Program

Our Goal is to Enhance the Delivery of Hospice Services to Patients Residing Outside of the Traditional Home Setting.

Valor HospiceCare has developed innovative programs to enhance the partnership experience of caring for patients residing in Assisted Living and Adult Care Homes. Our quality focused services exceed the State and Federal programs by turning standard care into exemplary care for all involved.

Features and Benefits of the Program Include:

- The Valor PatientCare™ team manages the more specialized palliative care needs of the patient, allowing facility care providers to focus on the provision of quality core services
- Our interdisciplinary team of health care professionals such as physicians, nurse practitioners, nurses, CNAs, social workers and spiritual care providers are available to support not only the patient and family but the care facility staff as well.
- Valor HospiceCare & PalliativeCare becomes the central point of contact for patients electing Hospice services in the care home setting. We provide seamless solutions to billing, care coordination and inter-team communication concerns.
- Our improved standards for patient care provide increased support to physicians and healthcare providers through central coordination and paperwork reduction.
