

Valor PatientCare™ Program

The Valor PatientCare™ Program is unique in the industry and the heart of our mission to provide the highest quality of care and service to all we serve. Valor PatientCare™ provides each patient and family a plan of care designed to support their distinct and individual needs. Under the guidance of the hospice Medical Director, the PatientCare Team collaborates with the patient's attending physician, the patient and those who care for them to develop and initiate a program of care that meets the ever-changing needs of patients facing end of life. This treatment program is reviewed on a regular basis by the PatientCare Team and revised as appropriate. In addition to regularly scheduled home visits by fully trained and licensed medical staff, the emotional and spiritual needs and desires of each patient are incorporated into every Plan of Care.

Goal

We will exceed standard regulatory guidelines by raising the bar to do everything we can to allow those we serve to make the best of every day. We will ensure that those we serve receive consistent, reliable, efficient and effective care and service.
